

Ukraine's initiative on statistical data and tender notices within the GPA

The main values and principles of the GPA

All the principles ensure the main goals of the GPA - to open public procurement markets to international trade and ensure access to these markets for business

This is how business feels about and looks for the opportunities within the GPA today

A large number of national web portals with the information about procurement

Limited opportunities to monitor and analyze information

Incomplete
statistical
information on
procurement
activities covered
by the GPA

Different languages and formats

The fragmentation and disunity of information about procurement within the GPA is one of the biggest obstacles for business to take part in public procurement tenders

A large number of national web portals with the information about procurement

Canada
'Buy and Sell
Canada'

https://buyandsell .gc.ca/

The EU
'TED'
http://ted.europa
.eu/

More than 45 web portals?!

DOFFIN

Database for offentlige innkjøp

Japan
'Jetro'
https://www.jetro
.go.jp

Israel
'Government
Procurement
Administration'
http://mr.gov.il/

A dearth of easily accessible, detailed and reliable statistics on the significance of GPA government procurement activities

Challenges of interpretation and analysis

Incomplete statistical data within the GPA

Parties

No single standards for reports

No recent statistical data on global procurement market (the latest is of 2002)

The information available is limited and does not allow business and GPA Parties to evaluate all the advantages and opportunities of the GPA

Ukraine aims at enhancing the values of the GPA

- Elaboration and creation of unified e-portal which allows to aggregate the announcements of procurement procedure within the GPA using the Open Contracting Data Standard
- Implementation of Business intelligence module (BI) as data analytics tool for monitoring and analyses of procurement information for GPA Parties

GPA can provide a modern and progressive e-tool in international trade

All information available to everyone

https://bi.prozorro.org

378.29k

₹8.71bn

18.31k EXPECTED VALUE 230.93bn NO. OF TENDERERS 57.53k O. OF BIDS PER TENDI 2,48

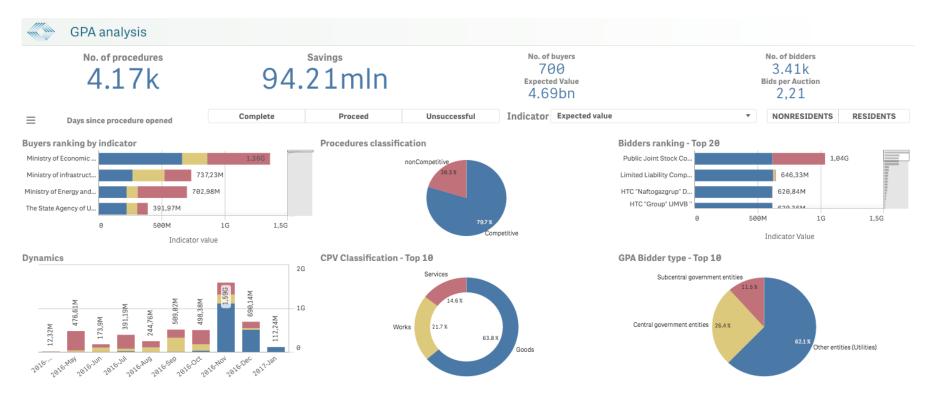

Public BI module (https://bi.prozorro.org)

provides all_information in a best-in-class format

Information about procurement covered by the GPA (GPA report)

 $\underline{\text{http://bi.prozorro.org/sense/app/e1a87316-d81e-4142-bd2b-5f2cae95b136/sheet/86c72d41-b166-4b0b-8572-ddf689cac2e4/state/analysis}$

Public business intelligence (BI) module in Ukraine provides all available information about Ukraine's

procurement covered by the CPA

Open contracting is an approach to improving public procurement through: open data, monitor data and get feedback from business and civil society

Planning Tender Award Contract Implementation

An open data schema describing how to release documents and data at each stage of a contracting process as machine readable, flexible, extensible, user friendly data

Shaped by user needs

Four user needs:

Value for money

Integrity

Effective service delivery

Level playing field for business

Unified, structured data & records (with unique IDs etc)

Our aim is a modern and progressive e-tool in international trade

The **Open Contracting Data Standard** builds on best practice of government data

The Open Contracting Data Standard (OCDS) approach

Publish early, and iterate

Reusable objects: organisations, tender information, lineitems, amounts etc.

Common open data publication patterns

Recommended data and documents at basic, intermediate & advanced levels

Guidance on improving data collection and data quality

A growing community of users and range of open source tools

OCDS provides a model for disclosure of data at all stages of the contracting process to increase transparency and allow deeper analysis of data by a wide range of users

What we will have as a result?

A single e-platform with the information on public procurement will help:

- enhance the internal system of statistics
- deepen cooperation among the GPA parties
- ensure accessibility for analysis and public oversight
- give acceding WTO Members a better sense of the market access benefits that await them

Next steps

Circulation of a questionnaire concerning abovementioned issues among the GPA Parties

Development of the **pilot project** on e-portal within the GPA with Parties that are interested in sharing the information on public procurement using Open Contracting Data Standard

Launching **MVP** (Minimum Viable Product) **of e-portal** with e-notices (initial stage)

Ukraine's further active collaboration and sharing of the experience with GPA Parties.
